Teamleaders Information

The team management provides all team members with all the necessary information, sufficiently and openly. The team and each team member is always included in the flow of information through regular team meetings.

Available Versions: GER – ENG - SLOV

Use & Benefits of the DNLA TA

DNLA TA helps to turn work groups into real teams! For a total of 69 factors, the situation assessment of the group members is presented in detail. Not only the total value, but also the exact distribution of the assessments of the team members, in comparison with the team management, becomes apparent. In subsequent workshops, a precise assessment of the current situation is carried out. Specific development measures are agreed directly, with the participation of all team members, and implemented jointly by all.

Successful together - with DNLA – Discovering Natural Latent Abilities!
